

Little Children's Bible Lessons

Instructions

1. It does not matter the time of the year when you start using this book for there are always flowers to study. Check in your area and visit flower shops and nurseries.
2. It would be well to take many walks that you might observe flower gardens, wildflowers or plant a flower garden. If the season is not right, have a flower pot garden in the home.
3. Remember to repeat your simple words over and over again.
4. Sing hymns that relate to the lessons, character qualities, and flowers. Sing the song, "Beautiful Flowers," from the song book, *Christ in Song*.
5. When a memory verse is too long, only give the young child a phrase from the memory verse. A very young child may only say one or two words of the whole verse. Reward him with a hug and a kiss. The important thing is to start teaching your young children to memorize Bible Verses. We recommend the Old King James Version as its words are easier for them to memorize as are metered poems.
