

## Temcat Mission Update: October 2023

### Greetings Brothers and Sisters;

This month has seen many blessings and some amazing miracles. Sad to report that Granny was badly injured in a car accident last week by the seat belt and airbag, but we know God promises to be with His children and guide us through whatever is allowed to come. Again we extend our heartfelt thanks to all who remember the Mission in your prayers and share your gifts of love. We pray daily that the Lord will send showers of blessings of all kinds for all of you. May the Lord keep you all and your dear ones under His sheltering wings.

### Cruel Attacks:

A Sad event becomes a miracle. We told how our young Deacon Emmanuel “was attacked by a political mob on the 12th and had his legs and feet smashed. We thank the Lord we were able to pay his hospital so he could be treated. We ask prayers for his healing.”

The Lord heard our prayers. Here the story: Ps T went and anointed him with prayer for his healing. At that time all were saying he would never walk again! But we said, “No Way” as we believed the Lord would heal His faithful servant. Ps T: “When I went to see our deacon, upon arrival I was astonished to find that he wasn't in his ward. When the family arrived for their lunch time visit they inquired. That is when we learnt that he had been moved to another ward. The hospital wards here are grouped ward A to E, and he was in ward D considered to be of the people who are very very sick. But now he was in ward A of people ready to be discharged. As if this was not enough alone. They had been running new x-rays as when they took him for a review which had been delayed, as there was a long list of booking for the hospital schedule, he was pushed on his wheel chair, and it was done with the family away. And the doctors were arguing about the results. The current results show that there is no scar or cracked bones. So they were wondering if results got mixed up. But it's impossible to get them mixed because they show name on x-ray of the person being scanned. And also they the picture is instant, they scan you, you get your x-ray picture instantly and leave the room with it in your hands. The first one I saw it also shows how badly damaged bones were with him diagnosed to be crutch and wheel chair bound. But now bones all fine and no crack just skin tissues outside show that he had been injured. He wanted to walk but they refused and reserved him saying their machine needs to be calibrated and rescanned again until then he is still bound to be in. They tested several objects and results were accurate save for what happened to him. So they said, either the machine was dead when the x-ray was taken first day which means they have to check details of whoever had the x-ray same day and cross check with possibility that most patients got false results and or it is that day of review whence the machine was wrong. As they were arguing and touching this and that and this and that, we waited on the corner for their instructions, and so they then postponed all x-ray schedules for the day saying a technician was need urgently as the machine was malfunctioning. They know bones heal but not at that speed never that is not possible to them. Actually he can move all his toes without any pain. And definitely he will walk again. So I interrupted a little and said, 'may I say a word or two? I don't think there's something wrong with your machines, and I am sure if you do all follows you won't find any mistakes as you think. I assure you, we prayed.' 'you prayed?' The senior doctor answered. 'yes a miracle happened,' I responded. And shook his hand and smiled saying, I wish I was trained to believe in miracles. But I am trained to believe in what I can measure. We went out and waited, after a prayer again I left the family with him. And he is still in the hospital for they have to fully agree to clear him out. We hope to hear from them anytime soon.” His Sister reports; “Our Brother Emmanuel self discharged himself from hospital. The hospital had said they would want to calibrate and do more tests to validate what happened and we left him there. As you know we are poor we were not able to visit him every day. So two days after we just saw him at the door at home. We wondered who had brought him, he said he had walked himself home. The hospital is some 40km away and he said he walked with those assumed once broken legs and had no pain. He grew tired of waiting for tests and just got up and walked away and did not clear himself with the hospital. We have him here at home he is fine and no pain anywhere.

Although he has scars, he is able to walk well.” The Deacon’s story: “Thank you for the prayers. I was healed and survived the killers attack. And I couldn't walk first few days and never had hope of using my legs ever again but

here I am and kick a ball. I heard that you were praying for me. All the pain and discomfort left a few days after and I felt much better. The only thing that was bothering was the itchiness of the legs due to them tying them upwards. And I think I got better long back but when I told them I feel fine they just would not believe me and thought I was crazy. When they came one day and found I had untied my legs from the elevation hangers and walked to the window that's when they quickly ran x-rays and started to come up with all the theories they brought that I was mistaken at first and even though the x-rays were there they thought they were not correct because they doubted I had healed. Thank you for the prayers. I believe it's a miracle. But to be honest, I thought that surely they had been wrong at first, because I did not think I could deserve a miracle myself, I thought I was too poor to receive a miracle. But one night when I was asleep there, I dreamt a man that touched my shoulder and said to me, 'you have been healed, why are you still here, do you want to have this problem again?' Just that and he left. Again in the near morning, I had the same dream again and I rose and left the hospital. The security guard at the gate would stop me I knew it, so I just evaded him by going through the side of the durawall which is broken. Many people who saw me on the road were shouting 'look a crazy insane person fled the hospital, call the police! Fortunately, if you call police in our country it takes ten hours for them to respond or more, so I safely walked home. I didn't want to stay there because I believed that staying there would mean that I am not believing I am healed and I may suffer again. So I took a leap of faith and fled.'" Note: The Hospital was doing very wrong to hold him when all could see he was well, but the Lord stepped in and freed him!

### **Testimonies and Adventures:**

Our young girl rescued from Chishawasha and the service of a witch needed ID so we were able to get her a Birth certificate as part of the Mission family. Here is her testimony: "This is Rudo Tsitsi Ticharwa now. Thank you for helping me to get a birth certificate. I am now a counted person known and with a good rights like every child. Thank you for accepting me into your family and making me called with the name of this family and I enjoying being family with them too. I am learnt to love and safe in the family. No more working up at midnight to going feeding my gogo [grandmother's] tortoise and frogs and black snake. Im no longer dreaming scaring dreams but peace at night. Thank you, I want to be long to this family for ever." Every night this child had to go naked and stand outside to serve familiar spirits, if late she was cruelly beaten! Now she is learning to be one of our MMVs Yes, If we are faithful we will all be the children of the Heavenly King!

Here is a testimony from Ps Missionary Maxwell to the joy of serving the Lord! "Well I am doing well, and I am preparing for Chishawasha, I love the work of God. It's in my veins to serve now." The team was taken to Chishawasha on Sept 24, and includes young Deacon Emmanuel, who has chosen to work with them and learn to become a missionary Pastor.

Another Rescue of souls: Ps T speaking of destroying the charms and devil objects on request of a new family at home Mission. "Yes we burnt them all. There were knives used to pierce people on a mirror and cause them sickness. clay pots and snake outer skins, live spirit frogs with beads. Rods with feathers and many other things. We prayed and burnt them. The entire family came to witness including the father of this woman and he gave himself to Jesus yesterday and said he wants to be baptized. Some of the family members traveled long to see these things and everyone was rejoicing. They had suffered all of them with these things but she would not let go. But recently I preached the story of the state of the dead and spiritualism. A person who had been invited on our night midweek service when she heard this, she got up and left the church running, she called her neighbours and said, 'come hear what is being said, exactly what you people are going through, come come!' and they all left what they were doing and flocked to church. They sat and listened and after service went and decided that they would want these destroyed. It was on a Wednesday last week, only contacted me yesterday that they now need to have these destroyed. The Spirit of God troubled them especially the one who had it. I am told she would pass out for 14 hrs and revive next day and they knew it was these things troubling her. And entire family went home singing we are free in Christ. I will be baptizing them, a special baptism on Sabbath. My heart is overjoyed. Well I also burnt their satchel that they used to carry these things and keep some at home. She wanted to remain with the satchel saying her child would use it to go to school but I didn't see it worthy so I

promised them to buy them a new satchel today, a small one would cost around \$20 we can definitely spare for that. I was not okay to let them with anything they had taken to the shrine before.” Praise the Lord!

**Something to think about:**

“God is at work, and Satan also is at work. Satan would have our minds drawn away from the mighty Helper, to ponder over our degradation of soul, and feel that all its powers are being wasted and God dishonored. Look away from yourself to the perfection of Christ.” {9MR 305.1}
