

Story of Amazing Borehole Miracle at New Binga Village

Thursday, September 05, 2024

This is Pastor's update of how the Lord use his gift of languages to work out the Borehole miracle of New Binga Village at present having the most modern and up-to-date Borehole set up in all of Zimbabwe! "Well, Things are flowing well there. [we do need more prayers that God will dress them and help those in the new rising village.] Now they have clean water. And I have taught them of cleanliness and to dig holes for waste and make sure the new village is clean. [they have no toilets or even latrines!] I have seen that although they did not have water, they also did not have containers but clay pots for that. God willing maybe we should be able to provide a 20 liter container per family someday. [We are sending those today!] And however, our team must be there for long as the work still needs time to establish, we don't want a church that will be left too early for it to survive. [the team wants to stay on longer, no problem]" [Now I was going to pay the balance for the basic borehole this coming week, but was so strongly impressed to send it right away this week! Now we can see a chain of circumstance that the Lord brought about! There sure are no coincidences in the Lord's work!!]

"Okay here's what happened. When I went to the company to do the payment the final one, I did have an opportunity presented to me on condition. They have now a new electric solar powered pump for the boreholes and 5000 liters reserve tanks. So the HR who now knows me and is a friend, just ended up telling me that their marketing was looking for a voice to use in their narration of adverts and the person who be paid \$800 for the work done, they were generating adverts and needed a voice to do the narration on the animations as they are written, they would have had employed five people to do that in our five main local languages which I can fluently speak, so jokingly the HR who knows that I speak several languages suggested that I tool the offer instead of give people hired I do them all, just one voice different languages. Well, I requested to see the scripts before deciding and when I saw that its nothing immoral or against our principles, well, I signed the contract and Friday spent most of the time recording with them.

Then I am finishing today. So instead of the money, I opted for them to install 2 reserve tanks, and four water taps. The builders I gave their families food supplies as I had agreed with them and they went with the tanks team on Friday to make the cement platform. They did their work Friday noon, and as it was an easy job they just could not finish before the Sabbath and so they waited and completed

today. [Sunday] [on Monday Pastor went and drove them home.] So the New Binga Village folks will have the most beautiful water supplying borehole that's electric and solar powered!"

On his way home, Pastor made the video we have online of the river that was their water supply! It was only heaps of sand and a couple muddy holes left they use for water! We can sure see how the Lord guided us to put in that borehole and made the extra miracles for it! Serious prayers are needed for water, rain and donations for Zimbabwe and New Binga Village! Amen!
